## Technical Expertise

Frontend: JavaScript, TypeScript, React, Next.js, Angular, Web Components (Lit), HTML, CSS, Responsive Design

Backend & APIs: Node.js, REST APIs, OAuth, WebSocket

CMS & Content: Contentful, WordPress, Headless CMS, Data Migration

Atlassian & Enterprise: Jira (Forge, Connect, Data Center), Atlassian APIs, ServiceNow

Data & Infrastructure: PostgreSQL, MySQL, Relational Databases, CI/CD, Vercel, AWS

Testing & Engineering: Jest, Cypress, Test Automation, Code Review, System Architecture

## Profile

Senior full-stack web developer with **7+ years of experience** working on real production systems, from early-stage products to **enterprise platforms used by tens of thousands of users**. I take ownership of complex work such as **CMS migrations, integrations, performance issues, and long-term maintainability**, not just feature delivery. Delivered measurable results, including **100.000+ content migrations** and **30–50% performance improvements**, while keeping live systems stable.

## Relevant Experience

### Full-Stack Web Developer

2025 - Present

[Independent Contractor, Remote](#)

Worked with a UK education organization on the modernization of a **production-critical platform** used by teachers and institutions.

#### Impact:

- Led a **Drupal → Contentful migration (100.000+ entries)** while keeping the platform fully live
- Built and maintained **Next.js applications** serving **tens of thousands of users**
- Reduced page load times by **~30–50%** through rendering and data-flow optimizations
- Developed **Node.js migration and validation scripts**, cutting manual work by **~95%**
- Managed **Vercel deployments** across preview, staging, and production environments

**Tech stack:** Next.js, React, Node.js, TypeScript, HTML, CSS, Contentful, REST APIs, Git, Vercel, Microsoft Dynamics.

### Full Stack Web Developer

2022 - 2025

[NTT Data, Timisoara](#)

Worked on **enterprise-grade Jira and web-based systems** used by large organizations, focusing on scalable frontend architecture, integrations, and long-term maintainability.

#### Impact:

- Developed and deployed **5+ custom Jira applications** across Forge, Connect, and Data Center
- Owned **end-to-end features**, from backend logic (Java, Node.js) to frontend and production rollout
- Built a **modular web client using Lit Web Components**, reducing UI duplication by **40%**
- Integrated Jira with **external enterprise APIs and ITSM platforms** (ServiceNow, DOT4)
- Improved UI performance and stability for large-scale internal applications
- Actively built production features using **Angular**, working with modules, components, services, routing, and state management concepts, with exposure to **NgRx and performance optimization**.

**Tech stack (used in practice):** Jira (Forge, Connect, Data Center), Java, Node.js, JavaScript, TypeScript, Lit Web Components, Angular, REST APIs, ServiceNow,

## Frontend Web Developer

2021 - 2022

[Tracknamic](#), [Oradea](#)

Worked on internal applications used by operational and product teams.

### Impact:

- Built **React-based internal tools** used daily by **dozens of users**
- Created **reusable UI components**, reducing duplicated code by **~30%**
- Integrated frontend applications with REST APIs and backend services
- Improved loading behavior and responsiveness across devices

**Tech stack (used in practice):** React, JavaScript, HTML, CSS, Less, Ant Design, Firma, Node, REST APIs, GitLab

## Software Development Trainer

2021 - 2022

[Software Development Academy](#), [Remote](#)

Delivered hands-on software development training focused on real-world skills.

### Impact:

- Trained **~50–70 students** across multiple cohorts
- Taught JavaScript, HTML, CSS, React, and Angular through **practical projects**
- Mentored students in debugging, problem-solving, and production-ready practices
- Introduced **testing fundamentals** (Jest, Cypress, Karma, Mocha)

**Topics & tools (hands-on):** JavaScript, HTML, CSS, React, Angular, Testing (Jest, Cypress, Karma, Mocha)

## Wordpress developer

Jun 2018 - Jul 2021

[Independent Contractor](#), [Oradea](#)

Built business websites and early-stage platforms for small and medium clients.

### Impact:

- Delivered **15+ custom WordPress websites**
- Developed custom themes and frontend features tailored to business needs
- Implemented performance and mobile optimizations (PageSpeed improvements)
- Worked directly with clients on requirements, delivery, and maintenance

**Tech stack (used in practice):** WordPress, PHP (customization level), JavaScript, HTML, CSS, REST APIs, PageSpeed optimization
